

Secondary outcomes – Post-intervention CPG data collection

The **data collection period** for clinical practice guidelines is from **February to April 2008**.

1. Each SEA-ORCHID site will review a summary of the baseline data provided for local and national CPGs and indicate whether the baseline guidelines:
 - are still in use during the data collection period
 - were based on a systematic search for evidence
 - were developed by a multidisciplinary team.

The date of last update of the baseline CPGs will also be collected.

2. Sites will also collect data via individual data sheets on practice guidelines/protocols in use during the data collection period that were not in use at baseline.

Forms to be downloaded (www.seaorchid.org/knowledgebank)

- CPG data collection instructions
- NEW CPG data forms - local guidelines/protocols
- NEW CPG data forms - national guidelines/protocols
- Baseline CPG data review – (for your country)

Completed forms are to be returned to Nathaleeya Narash, Natthaleeya_n@yahoo.com, **by the first week of May 2008**.

For any questions re data collection, please contact either Steve McDonald, steve.mcdonald@med.monash.edu.au, or Melissa Thomas, mthomas@usyd.edu.au.
